

We Doug Wesley and Malinda Lane feel That the FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections.

Indiana's Telephone Privacy law has improved our time at home.

Indiana's law has been a great improvement!!! "I used to receive 12 calls per week, sometimes 5 or 6 calls a day now We only receive about one per week").

We would like to keep our telephone law just as it is. We do not want to be hounded and Harrased by unwanted calls of this nature our phone is for personal and private use and is not a tool for sales pitches if we are in the market for some purpose we will seek out thier services but will never buy anything because someone is phone soliciting.

Thank you for your attention to this message.
